DesignClad FAQ

What is DesignClad?

Available exclusively from London Stone, DesignClad is a 5mm+ thick revolutionary contemporary cladding system that transforms vertical wall design possibilities for Landscape Specialists. With a huge range of colours available in sizes up to 1500mm x 1000mm, there is a material for every project and every design style.

DesignClad is a 100% natural product and is manufactured with the same raw materials as Porcelain.

Is it hygienic?

DesignClad is very hygienic because it is non-absorbent, it does not produce mould, fungus or bacteria.

Does it scratch?

The materials in DesignClad register 7 & 8 on the Mohs Scale. Making DesignClad very resistant to scratching.

Does DesignClad lose its original colour?

No, DesignClad is manufactured in one solid mass and is then protected by a layer of vitreous enamel. These processes ensure that DesignClad is impervious to both sunlight and sudden changes in temperature.

Does it stain easily?

No, DesignClad has a non-porous surface which prevents dirt, oils or liquids from penetrating. It is also resistant to stains and dirt in general. Soap and water is perfectly adequate for daily cleaning.

DesignClad FAQ

Is DesignClad fire resistant?

DesignClad is fire-resistant and complies with the safety requirements for use in public and private areas.

Can the 5mm+ thickness be used for flooring?

Yes, DesignClad 5mm+ is suitable for flooring.

What are the stock sizes?

1500x1000x5mm+

Where can I get more information?

DesignClad FAQ

Should I prime the wall before installing DesignClad?

Yes, priming the wall will help to aid adhesion between the adhesive and the substrate.

What type of adhesive should I use?

A flexible adhesive must be used.

What size jointing gap should I allow for?

Jointing gaps should be a minimum of 3mm.

What is the best way to cut DesignClad?

DesignClad should only be cut using specialist tools. London Stone can advise on the best tools to use, or alternatively London Stone can cut to your specifications.
